Explore Your Shore!

Explore Your Shore! is a Citizen Science project focused on increasing our knowledge of the distribution of our intertidal species, exploring their potential as bio-indicators of water quality and climate change, and highlighting actions we can all take to tackle water pollution and climate change.

They are looking for members of the public of all ages, and schools, to volunteer to take some time to Explore Your Shore! and help record Ireland's intertidal species. Explore your Shore have lots of great information on wildlife that is found on our shores and sea.
