Local Authority Water Programme

The Local Authority Waters Programme (LAWPRO) works with Local Authorities and State agencies to protect and restore water quality:

- Coordinate efforts to achieve the environmental objectives of the EU Water Framework Directive.
- Support local communities to protect and enhance their local waterbodies.
- Build a better understanding of the issues impacting on water quality.

LAWPRO's Communities Team support communities and stakeholders to deliver local water quality projects and initiatives and provides education and public engagement on issues related to water.
