Met Éireann

Met Éireann is Ireland’s National Meteorological Service, is it is the leading provider of weather information. Its mission is to monitor, analyse and predict Ireland’s weather and climate, using the latest technological and scientific advances. As well as giving weather forecasts, Met Éireann conducts research on weather prediction, meteorology, solar radiation, environmental monitoring and climate change. One of Met Éireanns’ most important roles is to protect life and ensure citizen safety. Warning Services include issuing colour coded (Yellow, Orange, Red) warnings when weather conditions are expected to meet defined thresholds for rainfall, wind, thunder and lightning or snow and ice.
