All-Ireland Pollinator Plan

The All-Ireland Pollinator Plan is an island-wide attempt to reverse declines in pollinating insects, and is managed by the National Biodiversity Data Centre.

All-Ireland
Pollinator Plan

One third of our bee species are threatened with extinction from Ireland. The All-Ireland Pollinator Plan is about all of us, from farmers to local authorities, to schools, gardeners and businesses, coming together to try to create an Ireland where pollinators can survive and thrive. The plan provides information on practical actions for everyone to help protect pollinators and citizens can get involved recording data on our pollinators
