

About the Rediscovery Centre

The Rediscovery Centre is a creative space connecting people ideas and resources. We bring together the skills and expertise of artists, scientists, designers and craftsmen, united in a common purpose of sustainability, resource efficiency and reuse.

Rediscovery Centre's Education Programme provides a variety of exciting workshops that are based on hands-on enquiry and experiential learning. Our workshops for primary schools are linked to the primary curriculum. Workshops can be delivered either in our centre, in your own classroom, or virtually online.

Our educators are trained in the delivery of environmental education and are Garda vetted. The Rediscovery Centre is an accredited SFI Discover Centre.

Primary School Workshops

Our primary education workshops are 90 minutes in duration and link to the primary level curriculum through a range of subjects. Our education workshops for primary level covers a variety of environmental and STEM topics, and link with the Sustainable Development Goals.

Each workshop features a presentation, a range of interactive activities and ends with a feedback session to encourage the students to share what they have learned. We can facilitate a maximum of 30 students per workshop.

Available Nationwide!

Workshop Prices

Onsite at the Rediscovery Centre

- 90 minute workshop for 1 class: €200
- 2 x 90 minute for 2 classes: €400
- 3 hour workshop for 1 class: €350

Outreach and Virtual in your school

- 90 minute workshop for 1 class: €250
- 2 x 90 minute workshops in one day €400
- 3 x 90 minute workshop in one day €600

Travel Costs

Location

Cost

- Greater Dublin area (within 60km of Dublin) €0
- Cork City/Limerick City/ Galway City (within 60km of city) €0
- Between 60km and 100km of city €50
- Over 100km from city €80

Government of Ireland

Workshop Topics

**** Only available in Dublin**

Biodiversity Workshop

Introduces students to biodiversity, with particular emphasis on Ireland's biodiversity, ecosystems, food chains and food webs, and animal adaptations. Discusses the importance of biodiversity, human impact, and encourages sustainable living to ensure the safety and the conservation of the environment and its biodiversity.

Suitability: Junior Infants to 6th Class

Circuits Workshop

Explores the principles of energy, electricity and circuits, renewable and non-renewable forms of energy, electricity generation, and the basic components of circuits. Students experiment with working circuits to learn about electricity, circuits, lights, fans, motors, resistors and alarms.

Suitability: 4th to 6th Class

Climate Heroes Workshop

Introduces the science of climate change, exploring the causes and effects of climate change and how we can take climate action. The workshop features a range of hands-on activities to explore the science of climate change, including climate change quiz, investigating the effects of climate change, examining Climate Action Heroes from around the world to inspire the students to create their own climate action plan.

Suitability: 3rd to 6th Class

Forces Workshop **

Covers the topics of forces, exploring what forces are, how objects interact, different types of forces and how we use forces in everyday life. The workshop features a range of hands-on experiments and activities to investigate different forces, such as gravity, friction, air resistance, magnetism and buoyancy.

Suitability: 3rd to 6th Class

Creative Waste Reuse Workshop

Introduces the concept of waste reuse and includes a wide range of hands-on arts and crafts activities reusing waste materials such as fabric, scrap paper, food cans and tetra packs

Suitability: Junior Infants to 6th Class

Workshop Topics

Global Citizenship Workshop

Introduces students to global citizenship, sustainability, and the Sustainable Development Goals. The workshop can be tailored to fit the topics of Waste, Energy or the Marine Environment. Includes a variety of hands-on activities around global citizenship and environmental issues.

Suitability: 3rd to 6th Class

Energy Workshop

Introduces the topic of energy, renewable vs. non-renewable sources and energy use in Ireland and includes discussion of types of energy. Various activities are used to explore energy and its application, such as making a water wheel, solar oven or a wind turbine.

Suitability: 2nd to 6th Class

Engineering Workshop

Introduces engineering concepts and processes, types of engineering, and illustrates how engineering is an essential part of our lives. The hands-on activities develop mathematical thinking, problem solving skills, and spatial awareness, and help foster an interest in engineering. The activities include a range of engineering challenges from K'Nex constructions to building an earthquake proof house.

Suitability: 3rd to 6th Class

Maths Detective Workshop **

Presents the five curriculum strands (numbers, algebra, shapes and space, measures and data) to students in a fun and interactive way while practicing maths skills to solve mysteries, puzzles, and crime! The activities are linked to the primary maths curriculum.

Suitability: 3rd to 6th Class

Geology Workshop **

How geology shapes our lives! Explore what geology studies are and the importance of geology in everyday life (rocks and minerals in production of goods (soils for growing food and filter water etc.) We will look at different types of rocks and minerals, make our own fossils and even simulate earthquakes.

Suitability: 3rd to 6th Class

Workshop Topics

Science Workshop

Introduces students to science, what science is and how it affects our daily lives. A variety of hands-on interactive science investigations explore science topics including Physics and Chemistry. From kitchen science to magnetism, this workshop will bring the inner scientist out in everyone.

Suitability: 3rd to 6th Class

Space Workshop

Covers topics of space, investigating the Universe, origins of the solar system, the planets and moons of our solar system and looking at space exploration. The workshop features a range of hands-on activities around the space theme, including investigating meteor impacts, exploring stored energy and making rockets.

Suitability: 3rd to 6th Class

Transport for the Future Workshop

Explores transport and the impacts of transport on people, the planet and the economy, and introduces students to sustainability and sustainable transport. During the workshop, students will look at how STEM can provide solutions for sustainable transport for the future. The workshop features a range of hands-on activities to explore sustainable transport.

Suitability: 3rd to 6th Class

Waste Workshop

Introduces the topic of waste, how much we produce, and what we do with it. It describes the differences between reducing, reusing and recycling, and discusses attitudes towards waste. Includes a variety of hands-on activities promoting reusing and recycling waste materials.

Suitability: Junior Infants to 6th Class

Water Workshop

Covers the topics of water uses, water sources, water properties, water pollution, water conservation and the water cycle. Various activities and games are included to demonstrate the water cycle, water pollution and the importance of water conservation.

Suitability: 3rd to 6th Class

Plastic Problems Workshop

Explores the science of plastics, what is plastic, where it comes from and the types of plastics. The workshop examines the problems caused by plastics, its effects on the planet and people, STEM solutions to these problems and how we as individuals and communities can take action and includes a range of hands-on activities.

Suitability: 3rd to 6th Class
